# Mk4 George Version 1.06

---

- Changed welcome.wav: hinata's "Let's go!"
- Changed menu-background.jpg: [pippi](#)

pippi is so cute!!!!!!!!!!!!!!!!!!!!!!!!!!!!

- Changed ranking-maxcombo and ranking-accuracy in order to fix size respectively.
- ~~Moved old materials from v1.05 and new materials from current version to EXTRA directory.~~  
~~**EXCLUDE ranking-maxcombo and ranking-accuracy!**~~

SO SORRY!!!

There is ranking-maxcombo and ranking-accuracy functions in **ranking-panel!**

So, I sat new ranking-maxcombo and ranking-accuracy pic files as dot-pic to delete these.

- **Challenging!**

Changed scorebar: The **username**, **country** and **avatar** are written into scorebar!

Used "[osu! healthbar generator](#)" to create that.

~~I want to create original scorebar some day...~~

# Mk4 George Version 1.07

---

- Adjusted ACC & process meter.

Thx for using my skin, J.G!
